

Community Build
11am, June 17th

Attendance: Vinessa Karnofski, Ericka Hazen, Jon Ducharme, Lisa Kaino and kids.

- Wood chips were redistributed inside the play structure area so there were no deep channels under the swings and less exposed cement sidewalk around the border of the play area.
- Filled in around the sign with gravel so it was less hazardous to toddlers.
- Graded out around the picnic pavilion and around the sidewalk shoulder.
- Pulled weeds

Recommendations:

- Put some topsoil over the gravel along the south side of the sidewalk to encourage grass growth and eliminate steep inclines and utility boxes that sit up higher than the ground.
- Wood chips are not needed this time around but next year plan on at least five yards.
